Work of Experience (2.5 years)

Rarejob Phillipines Inc.

Role: Systems Engineer | Feb 2025 – Oct 2025

Project link: rarejob.com, rarejob.com.ph, rarejob.co.jp

Technology Used: Laravel, Vue.js, angular, Yii, AWS, redash, MySQL

- **Part of the Website Support Team**, ensuring system stability and supporting internal/external applications.
- Translated high-fidelity Figma designs into scalable Vue.js components, reducing friction between UI/UX and engineering teams.
- **Infrastructure Reliability:** Maintained 99.97%
- Participated in code reviews to ensure code quality.
- Handled data requests from users, ensuring accuracy and timely delivery.

National Center for Mental Health

Role: Full Stack Developer | Sept 2023 – January 2025

Project Title: Curemed – Pharmacy Information System

Technology Used: Laravel, React Typescript, MySQL

- Maintained the web application, resolved bugs, and deployed feature updates while ensuring 99.9% uptime.
- Developed and maintain the website's front-end using Blade, React, and TypeScript to create a smooth user experience.
- Implemented a microservices architecture to connect and streamline communication between the MMS Information System and the Medicine Inventory & POS System.

Sammy Snake LTD

Role: Backend Developer Game Analyst

Project: [Nova Rally](#)

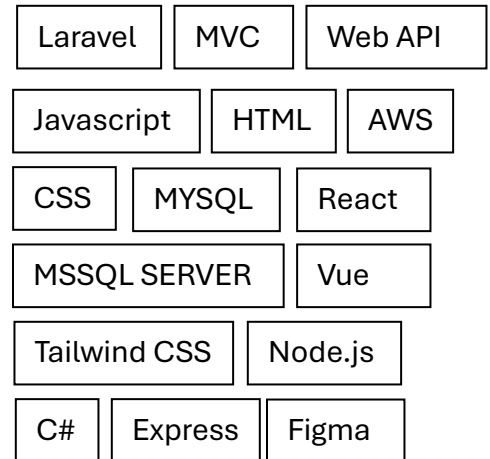

Technology Used: Node.js, Express, React

Description: Developed an external application for the Nova Rally NFT game during my internship, enabling users to view and analyze race history data. Contributed to backend development using Node.js and Express, and supported frontend integration with React.
